

Client Contribution Fees Structure **

Standard fees are based on an average individual or combined annual income, with reduced cost counselling for those businesses who refer their staff to Life Linc for individual or couples counselling.

If you have a Ministry of Social Development client number, you might be able to get financial support to help cover the costs of your counselling sessions. Forms are available from their website. We also recommend that you complete a redirection form, this way the funds will come directly to Life Linc.
